

IM exchange

ScrumMaster for Mobile App: Left you a voicemail about the project. All is good!

You: Great. What about the bug fixes?

ScrumMaster: Oh yeah, forgot to tell you. Those were fixed – at least we thought. All the issues were fixed from the last release. And bonus – really great feedback from beta testers!

ScrumMaster: Jafar is working on monitoring their feedback and any reported bugs. But as of right now, no risks. Will keep you posted.

You: Any other open items?

ScrumMaster: No. All the planned work is closed and ready for review by the Product Owner and team in the morning. Everything should be accepted and released tomorrow.

Iteration 5 starts the day after that. We will have the beta testers try out the new release, as well as extending the product to more outside of the initial user base.
